INTRODUCTION

The County Board of Supervisors adopted the County of San Diego's Subarea Plan for the Multiple Species Conservation Program on October 22, 1997. The County's associated Implementation Agreement (IA), became effective on March 17, 1998. The IA identifies the goals, objectives and responsibilities of the signatories including the California Department of Fish and Game, the United States Fish and Wildlife Service, and the County of San Diego.

This is the First Annual Habitat Tracking Report for the County of San Diego's Multiple Species Conservation Program. The report has been prepared in accordance with Section 4.4 of the County's Subarea Plan, and Section 14.0 of the IA. It provides an accounting of the habitat lost and preserved from March 17, 1998, through the end of the calendar year.

REPORT SUMMARY

The County is required to account for the amount of habitat lost (take), and gained (preservation), on a yearly basis. The Subarea Plan covers approximately 252,248 acres of land. The overall preservation goal of the County's Subarea Plan is expected to cover approximately 101,268 acres of land. Prior to March 17, 1998, there were approximately 62,550.67 acres (Baseline Preserve Area), of preservation land that was included in the Subarea Plan (Figure 1). This land includes all land acquired within the Subarea either by the Federal, State or Local jurisdictions or land that was negotiated to be preserved by private landowners within the Lake Hodges and South County Segments.

Table 1 provides information, by vegetation type, of the amount of each type of vegetation preserved prior to implementation of the Subarea Plan. Based on this information the County, along with its public and private partners, will be required to obtain approximately 38,717.33 acres of land to meet the preservation goal of 101,268 acres.

The report accounts for habitat loss and conservation within the Subarea Plan associated with the following types of development projects between March 17, 1998, and December 31, 1998:

1. Private Projects (TM/TPM's) that have Final Map Approval.
2. Projects that have been issued Grading Permits.
3. Building Permits exempt from the Biological Mitigation Ordinance.
4. New agricultural clearing exempt from the Biological Mitigation Ordinance.
5. Lands acquired by the County or other governmental agency for Preservation Purposes.
6. Approved Mitigation Bank Lands with at least one credit utilized and Non-approved Mitigation Banks.

FIGURE 1 - COUNTY OF SAN DIEGO MSCP AREA

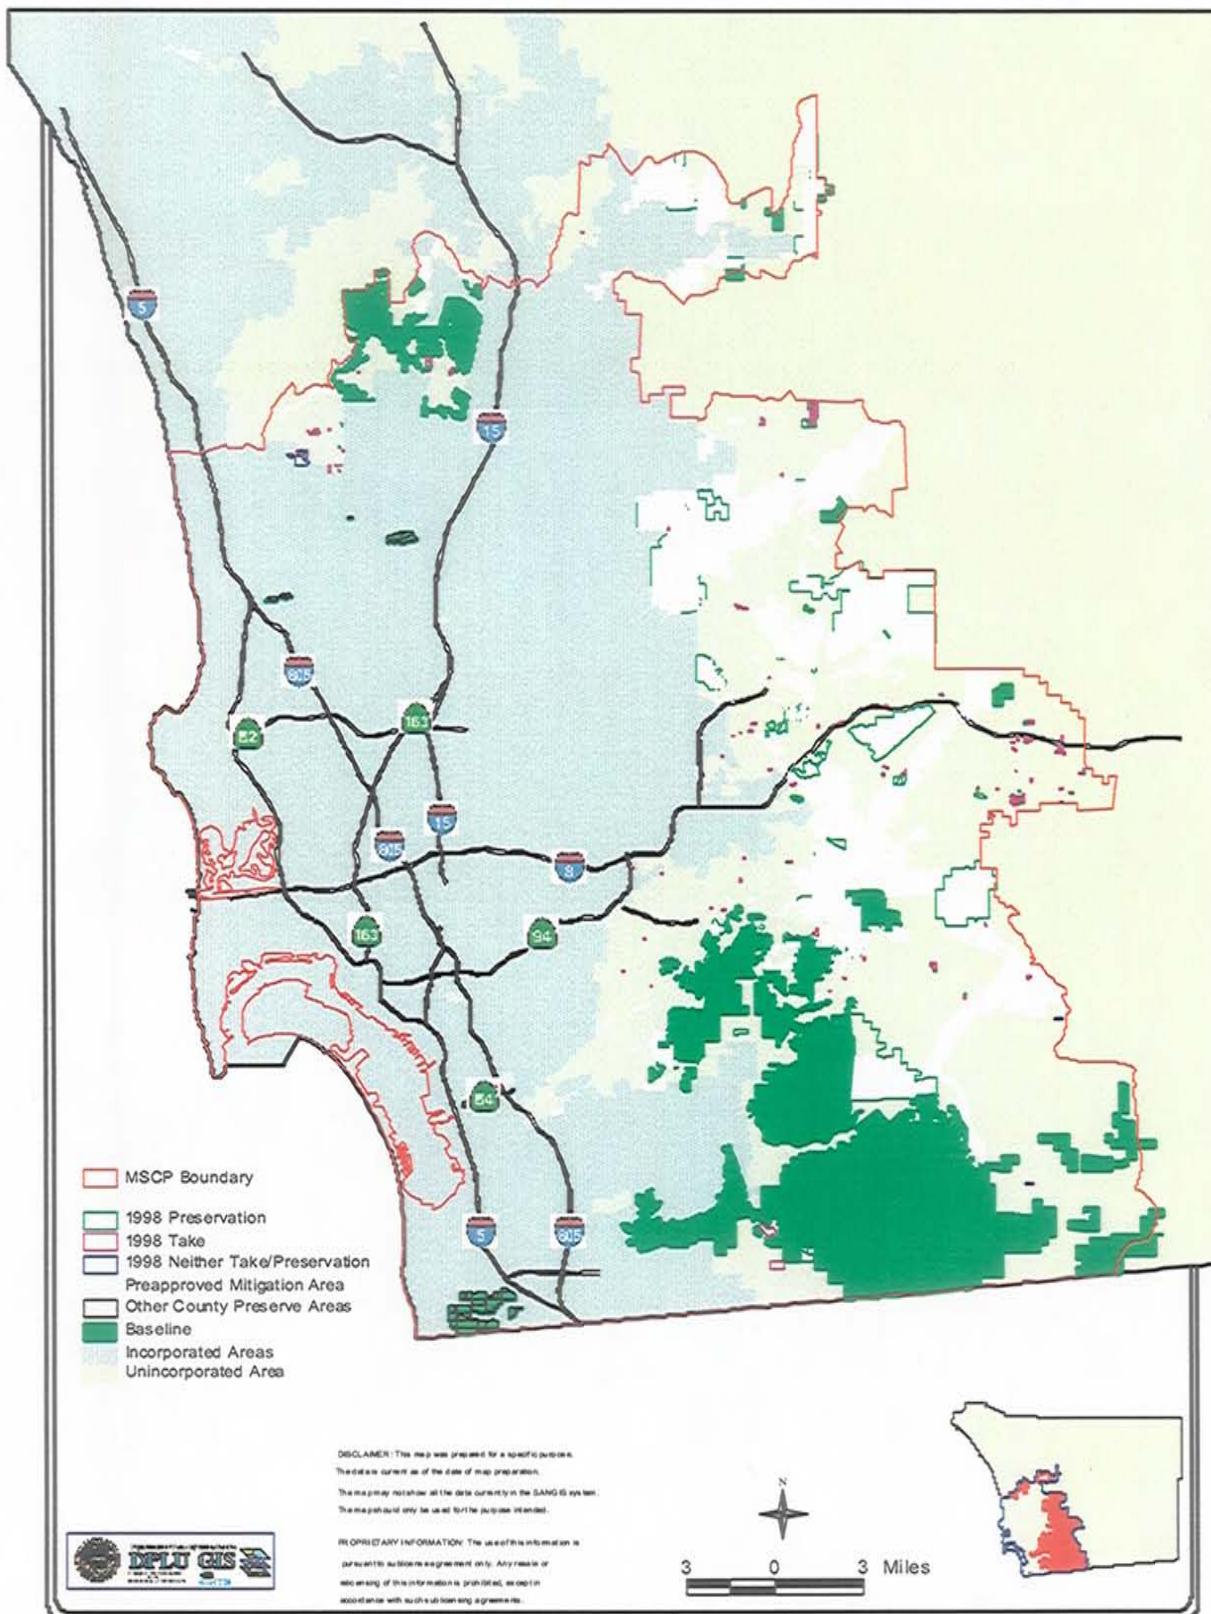

TABLE 1 – BASELINE VEGETATION TOTALS

VEGETATION TYPE	ACRES
Eucalyptus Woodland	69.14
Disturbed Wetland	25.57
Disturbed Habitat	428.21
Urban/Developed	342.49
Freshwater	23.51
Non-Vegetated Channel	148.25
General Agriculture	21.85
Orchards and Vineyards	22.22
Intensive Agriculture	0.25
Extensive Agriculture	195.6
Maritime Succulent Scrub	187.88
Diegan Coastal Sage Scrub	25400.2
Chaparral	17111.03
Southern Mixed Chaparral	6499.91
Southern Granitic mixed Chaparral	227.7
Northern mixed Chaparral	32.33
Granitic Northern Mixed Chaparral	709.71
Chamise Chaparral	1011.28
Maritime Chaparral	11.46
Coastal Sage-Chaparral Scrub	409.55
Valley and Foothill Grassland	619.43
Valley Needlegrass Grassland	303.51
Non-Native Grassland	1134.69
Freshwater Seep	1.86
Cismontane Alkali Marsh	119.08
Freshwater Marsh	16.28
Coastal and Valley Freshwater Marsh	72.04
Southern Riparian Forest	210.6
Southern Coast Live Oak	
Riparian Forest	388.37
Southern Arroyo Willow	
Riparian Forest	21.69
Southern Cottonwood-Willow Riparian	15.84
Southern Sycamore-Alder	
Riparian Woodland	18.01
Southern Riparian Scrub	34.37
Mule Fat Scrub	7.64
Southern Willow Scrub	42.14
Tamarisk Scrub	390.68
Coast Live Oak Woodland	219.86
Dense Coast Live Oak Woodland	431.68
Open Engelmann Oak Woodland	15.24
Southern Interior Cypress Forest	5609.52
GRAND TOTAL	62550.67

The overall amount of take and preservation that occurred during the 1998 accounting period was 884.49 acres and 10,022.51 acres respectively. These totals include both urban/developed and disturbed habitat types. Subtracting 302.81 and 171.79 acres of urban/developed and disturbed habitat from the above totals results in an overall take of 581.68 acres and preservation of 9,850.72 acres (Table 2). Table 2 also identifies areas that are considered as neither take nor preserve. This includes 136.12 acres of land that were identified as non-biological open space or areas outside of take associated with building permits and agricultural clearing.

TABLE 2 - TAKE/PRESERVATION TOTALS

TAKE/PRESERVATION	ACRES
Preservation	10022.51
Take	884.49
Neither	136.12
GRAND TOTAL	11043.12

The IA identifies that, regionally, the goal of the Subarea Plan is to create a 101,268-acre preserve. The Subarea Plan is comprised of three separate segments: the Lake Hodges segment, the South County segment and the Metro-Lakeside-Jamul segment.

The Lake Hodges segment and the South County segments include hard-line preserve areas. The preserve areas within these two segments were designated through negotiations between several private property owners, the Resource Agencies and the County prior to adoption of the MSCP. Preserve areas within the Metro-Lakeside-Jamul segment of the County's MSCP are being assembled through exactions placed upon development occurring within the segment or through acquisition by the local, state or federal government. Acquisitions will be obtained only from willing sellers.

LAKE HODGES SEGMENT

The Lake Hodges segment covers approximately 8,814 acres of mostly vacant land. The preservation goal for this segment will include approximately 4,589 acres of natural habitat exclusive of ruderal and disturbed habitats. This total includes all the areas to be placed within the preserve boundaries prior to approval of the MSCP as negotiated.

In 1998, conservation easements within this segment were conveyed to the County (or other Resource Manager) - over 829.91 acres of habitat. (Table 3 - Lake Hodges Conveyance Areas). The conveyance areas are identified on Figure 1 by green hatching.

Table 3 indicates, by habitat type (Holland95), the amount of each vegetation type that makes up this 829.91 acres.

**TABLE 3 – LAKE HODGES SEGMENT:
TOTAL CONVEYANCE ACREAGE**

HOLLAND95	VEGETATION TYPE	ACRES
11100	Eucalyptus Woodland	6.72

61300	Southern Riparian Forest	0.00
61310	Southern Coast Live Oak Riparian Forest	0.25
61320	Southern Arroyo Willow Riparian Forest	9.98
63300	Southern Riparian Scrub	0.67
63310	Mule Fat Scrub	3.73
63320	Southern Willow Scrub	16.35
71160	Coast Live Oak Woodland	1.10
Grand Total		829.91

SOUTH COUNTY SEGMENT

The South County segment covers approximately 82,767 acres of land in the southwestern portion of the County. The preservation goal for this segment will include approximately 48,240 acres of natural habitat exclusive of ruderal and disturbed habitats. This total includes all the areas to be placed within the preserve boundaries prior to approval of the MSCP as negotiated.

In 1998, conservation easements within this segment were conveyed to the County or other Resource Manager - over 1,450.89 acres of habitat (Table 4 - South County Conveyance Areas). The conveyance areas are identified by green hatching on Figure 1. Table 6 indicates, by habitat type (Holland95), the amount of each vegetation type that makes up this 1,450.89 acres.

Table 4 indicates the total acreage of the preserve within the South County segment. This acreage is included in the County's baseline totals identified in Table 1.

TABLE 4 -SOUTH COUNTY CONVEYANCE AREAS

HOLLAND95	VEGETATION	ACRES
11200	Disturbed Wetland	0.04
11300	Disturbed Habitat	11.53

37000	Chaparral	291.25
37120	Southern Mixed Chaparral	49.19
37200	Chamise Chaparral	72.47
42000	Valley and Foothill Grassland	2.97
42110	Valley Needlegrass Grassland	0.09
45300	Alkali Meadows	0.00
71162	Dense Coast Live Oak Woodland	3.25
83230	Southern Interior Cypress Forest	16.92
Grand Total		1450.89

Subsequent to the approval of the MSCP, the Trust for Public Lands acquired approximately 929 acres of land known as the Las Montanas Specific Plan Area. This area was transferred into the Sweetwater National Wildlife Refuge Area managed by the United States Fish and Wildlife Service. This area will modify the South County segment because areas previously identified as take-authorized will not be developed.

The Las Montanas Specific Plan, as approved, would have allowed development of approximately 349 acres of the project area and would have included 535 acres of onsite open space and 23 acres of offsite open space, which were included in the baseline totals indicated in Table 1. Since no development will occur on Las Montanas, the South County segment preserve area has increased by 349 acres.

This area will be included by the County to meet the overall regional preservation goal of 101,268 acres.

METRO-LAKESIDE-JAMUL SEGMENT

The Metro-Lakeside-Jamul Segment, largest of the three segments, covers approximately 172,952 acres of land, of which 115,241 acres are considered natural and having habitat value. The preserve area planned for this segment will include approximately 44,764 acres of land.

As of December 31, 1998, there were approximately 7,437.79 acres of habitat preserved within this segment (Table 5: Metro-Lakeside-Jamul Preservation). An additional area totaling* 155.14 acres of habitat has been preserved outside of the Pre-Approved Mitigation Area (Table 6).

The Pre-Approved Mitigation Area includes the major biological core and linkage areas in the Metro-Lakeside-Jamul Segment and therefore approximates the location of the ultimate Preserve for this area. Lands preserved outside of the Pre-Approved Area will not be counted towards the County's preserve requirements unless the Wildlife Agencies and the County agree that such areas provide equivalent and acceptable Core and Linkage preserve values.

Critical Biological Resources – Several critical biological resource areas identified in Section 4.2.3 of the MSCP were acquired during 1998. Critical biological resource areas are defined as having high biological value and include locations of critical populations of target species. These include Daley Ranch, Sequan Peak, McGinty Mountain, and portions of Lake Hodges. These parcels were either purchased outright by local, state or federal agencies (Daley Ranch, Sequan Peak) or were acquired as Mitigation Banks (McGinty Mountain, and several parcels adjacent to Lake Hodges).

Linkages – In addition to the above resource areas, portions of a habitat linkage areas were acquired by the County of San Diego. These included approximately 86.0 acres in Lakeside known as the Lakeside Archipelago.

Within the Metro-Lakeside-Jamul Segment, specific mitigation requirements for individual projects will be consistent with the mitigation requirements set forth in the MSCP, the Subarea Plan and the County's Biological Mitigation Ordinance.

Based on the information provided in Attachment A and B and the above discussion, the cumulative take and the cumulative preservation in the Metro-Lakeside-Jamul Segment is 460.90 acres and 7557.66 acres

*Does not include Disturbed Habitat or Urban Developed Acreage.

respectively (Tables 5 and 7). These numbers indicate that habitat is being preserved at approximately 16.0 acres for every acre of take. Therefore, preservation of habitat is occurring in rough-step with development within the Metro-Lakeside-Jamul Segment of Subarea Plan.

During the preparation of this annual report an anomaly was identified within the Pre-approved mitigation area (PAMA) boundaries. This anomaly showed that several grading projects, which were within the PAMA area, did not have any natural habitat. There were three grading permits issued during 1998 that highlighted this anomaly. These three permits are included as figures 84, 85 and 86 (Attachment B). These projects clearly indicate that the PAMA includes non-habitat area within its boundary. These areas will not be considered as take and could potentially affect the overall amount of mitigation area that was estimated to be acquired from private development proposals.

MITIGATION BANKS AND GOVERNMENT PURCHASES

During 1998, several public and private projects utilized mitigation banks to offset their biological impacts. There are two types of mitigation banks found throughout the County. First, there are mitigation banks that are approved by the Resource Agencies. Secondly, there are those that have not yet received approval from the Resource Agencies. The difference between the two types of banks is that for approved banks the County receives credit for the entire acreage within the bank at the time when the first credit is purchased. However, the County receives credit in non-approved banks only for the total acreage, which has recorded conservation easements. In 1998, projects utilized ten different banks for offsite mitigation (Table 8).

TABLE 8 – MITIGATION BANKS

PRESEVATION CODE	BANK NUMBER	BANK NAME ¹	BANK MANAGER ²	CREDITS USED/CREDITS AVAILABLE ³	ACRES ⁴
106	MB-1	Santa Fe Views Mitigation Bank	TET	10.00/96.54 acres	88.66

1. Bank Name – As identified by The Environmental Trust (TET)

2. Owner/Manager of bank

3. Credits used/credits available – information provided by TET

4. Acres = Acreage as provided through GIS

5. Total does not include Singing Hills

For purposes of this report, approved mitigation banks included: The San Vicente-1 Conservation Bank totaling approximately 377 acres. Non-approved banks included: The Santa Fe Views Mitigation Bank, the Lake Hodges Mitigation Bank, Lakeside Curren Mitigation Bank, Upham Vernal Pool Mitigation Bank, O'Neal Canyon Preserve Area, The Mt. Miguel Mitigation Bank, The Marron Valley Preserve (recently acquired by the Bureau of Land Management) and the McGinty Mountain Preserve. The non-approved banks cover approximately 1,322.07 acres of land of which 1,112.67 acres have conservation easements granted over them. Singing Hills Mitigation Bank has been included with County Purchases. Several other banks such as the Sweetwater Mitigation Bank and

Boden Canyon have been accounted for within the baseline vegetation totals listed in Table 1.

GOVERNMENT PURCHASES

The Subarea Plan requires that the Governmental Agencies (Local, State and Federal), acquire approximately 18,000 acres of land in the Metro-Lakeside-Jamul Segment of the Subarea Plan. The goal for the county is to obtain approximately 9,425 acres of land with the Resource Agencies providing the other 9,425 acres.

During 1998, the Governmental Agencies acquired approximately 6992.0 acres of land for the purposes of Habitat Protection (Table 8). Currently there are five (5) properties that have been acquired. Three properties totaling 6905.91 acres were acquired by the State including: Crestridge, Sequan Peak, and Daley Ranch. Two others, totaling 160.02 acres were acquired by the county including: 86.09 acres of land within the Lakeside archipelago (Lakeside-1, Table 9) and the Singing Hills Mitigation Bank totaling approximately 73.93 acres.

OTHER AREAS

There are several areas of County owned land that are within other jurisdictions. Notables of these areas include the Los Peñasquitos Canyon Preserve and the Tijuana Valley River Park. Presently the Los Peñasquitos Canyon Preserve consists of 277.38 acres and the Tijuana Valley River Park, 1185.21 acres (Figures 87 and 88).

AGRICULTURAL EXEMPTIONS

During 1998, only two agricultural exemptions were issued that affected natural habitat. These exemptions impacted 3.38 acres of habitat.

TAKE-PRESERVATION CODES

The following are codes used in the County of San Diego 1998 Annual Report:

PRESERVATION: 10

- 101 Approved Mitigation Banks
- 102 Non-Approved Mitigation Banks
- 103 Government Purchases
- 104 Onsite Mitigation within the Pre-Approved Mitigation Area (Pama)
- 105 Offsite Mitigation within the Pama
- 106 Preservation within the Lake Hodges Subarea Plan
- 107 Preservation within the South County Subarea Plan
- 108 Preservation Areas outside the Pama With Credit
- 109 Preservation outside Pama Without Credit

TAKE: 20

- 201 Take with Related Mitigation (TM'S, TPM'S etc.)
- 202 Take with No Mitigation (TM'S, TPM'S etc.)
- 203 Take with Building Permits
- 204 Take with Agricultural Exemptions
- 205 Take with Clearing Permits (2,5,10 acres)

NEITHER TAKE NOR PRESERVE*: 30

- 301 Building Permits
- 302 Clearing Permits
- 303 Agricultural Clearing
- 304 Donut Holes
- 305 Golf Course Areas

* Areas outside approved Take areas but not within Preserve areas

ATTACHMENT A - LIST OF PROJECTS INCLUDED IN THE 1998 ANNUAL REPORT

Attachment A includes the habitat tracking information requested by the Resource Agencies for Items 1 - 4 (Tables 10 – 12). This includes location maps identifying the project sites and mitigation areas where applicable.

TABLE 10 – FINAL MAPS APPROVED IN 1998

TP-CODE ¹	PROJECT NUMBER	PROJECT NAME	FIGURE AND PAGE	HOLLAND95	VEGETATION TYPE	ACRES
